

Chemoxy International Limited is one of Europe's largest contract manufacturers with over 100 years of operating experience. It has two sites on Teesside employing 134 people. The site at Middlesbrough has been carrying out distillations since 1868 and our Billingham site was added to the portfolio in 1994. Chemoxy is now one of Europe's largest providers of custom manufacturing services to blue chip petrochemical and speciality chemical companies as well as to smaller companies with niche applications.

It's an exciting time to be working at Chemoxy as a Regional Growth Fund grant won by the company in 2012 has been used to fund the construction of a new production unit at our Billingham site, which was commissioned in September 2014.

We currently have vacancies for two

PRODUCTION ENGINEERS

Location & Package:

- **Location:** Middlesbrough and Billingham
- **Remuneration:** A highly competitive salary, Group Personal Pension Scheme, private healthcare and other competitive benefits.

The Job Involves:

- Health, Safety and Environmental improvements projects and studies
